

Pricing Information

Shooting League Management is a business so we have to make enough to keep the doors open, but this application is truly meant to help the shooting enthusiast at the lowest price possible. Instead of having membership fees, sponsor fees, usage fees, etc... we decided to use the toll-booth approach and charge the lowest price possible to only those that are using the software.

Our pricing is setup as simple as possible: **\$0.25 per shooter per week.** *

We charge the person setting up the league the FULL cost of the league at the time they setup the league. In the event that the league does not draw the maximum number of shooters that was setup for the league, we will automatically credit the person's credit card for the difference on the night the first week's scores are entered.

If you still have questions, please call our sales department at 972.489.1078

** Please note, the minimum total fee for managing a league is \$25.00.*

Below we have several pricing examples to help clarify any questions.

Example #1

Club ABC is having a 6 week skeet league with 48 shooters at 50 targets/night.

League Cost per Shooter: 6 weeks @ \$0.25/week = \$1.50 per shooter

Total League Cost: 48 * \$1.50 = \$72.00

Example #2

Club XYZ is having an 18 week trap league with 132 shooters at 50 targets/night.

League Cost per Shooter: 18 weeks @ \$0.25/week = \$4.50 per shooter

Total League Cost: 132 * \$4.50 = \$594.50

Example #3

Club AAA is having a 4 week 5-Stand league with 16 shooters at 100 targets/night.

League Cost per Shooter: 4 weeks @ \$0.25/week = \$1.00 per shooter

Total League Cost: 16 * \$1.00 = \$16.00 (\$25.00 will actually be charged.)

(The minimum total fee for a league is \$25.00 so the price per shooter will end up being \$1.56)
